

Dept. Genetics
Nov. 9, 1947.

Dear Dr. Hussemann,

The following Salmonella strains have been located and transferred. Please send someone over Monday to pick them up.

S-19 abortus bovis

S-25 newport

S-32 montevideo

S-36 gallinarum

S-46 enteritidis

S-61 typhimurium, IV variant

139 anatis

Let me know whether I can be of any further assistance.

Sincerely,

Joshua Lederberg
Ass't Professor.
